PROFILE

I have three years of experience in Software Engineering. A highly motivated individual and a quick learner, a flexible team player, eager to learn while experiencing new technologies.

EXPERIENCE

Software Engineer - ObjectOne (Dialog Axiata)

2019-July to present

Sim Only :

Enabling Dialog home broadband connection sales to be done via Order Management System only with the SIM, unlike the prevailing process where sales go along with a CPE while most of the other functions revolves around the concept of having both the items available including the troubleshoot work orders with the intention of monetizing the largely available unused CPEs in the market.

Did modifications in the Oracle procedures to allow this change. Also did front end and back end changes to identify whether a particular connection is a SIM only or a SIM + CPE.

Technologies: Java, Spring, Angular, Oracle Database,

BonusOnBillPayment :

VOLTE customers will get additional bonus data quota percentage from their standard anytime data quota upon an early bill payment, if the pay amount is more than or equal to the defined pay percentage of last bill outstanding, paid within the defined period.

Created a JAVA based Kafka consumer application to listen all the payments coming via different payment channels through the Kafka producer before validating different business conditions through this listener.

Technologies: Java, Spring, Apache Kafka, Oracle Database

StaffVPN :

Activating pre-defined data packages for a set of Dialog staff , VPN home broadband users, configured in a database table.

Technologies: Java, Spring, Oracle Database

HBB Extension:

The objective is to Increase HBB revenue by introducing new extension packages and introducing new extension validities specifically targeting Home Broadband Customer Data usage behavior and patterns. New Extension packages of 25GB and 50GB introduced, and customers are given the option of selecting Validity Period Such as 1Day, 7Days, 30Days. This enables for all HBB Postpaid customers.

Technologies: Java, Spring Boot, Oracle Database

Associate Software Engineer - [Zkewed](#)

2018-Jan to 2019-June

Unipoint :

The main objective of this Product is to provide a single Platform to track/earn/redeem loyalty points from any merchant without the need to use multiple cards and in return let merchants build their digital loyalty and marketing programs from the information obtained by the customers.

Technologies: Java, SpringBoot, JavaScript, JQuery, JSON, AJAX, HTML, CSS.

Facebook-Page-Scraper :

Can be collected facebook post's like count, share count, comments, image URLs, descriptions, updated date and sub posts of any facebook page using this application. This required a facebook access-token approved by facebook. Also, can collect data according to specified Date range. Collected data sends to Microsoft Azure to do Azure Text Analytics for data analytics purpose.

Technologies: Java, SpringBoot, Hibernate, MySQL, Azure Text Analytics

Exam Simulater :

Exam Simulator is designed for specifically for exam preparation. It allows you to create, edit, and take practice tests in an environment very similar to an actual exam.

Technologies: Java, MySQL, Jasper Report.

Instructor - [Institute Of Java & Software Engineering \(IJSE\)](#)

2017-March to 2018-Dec

Checking and Assessing student's work and giving feedback.
Project Architectural Designing.
Resource Tier (Database) planning and implementation (ERD, MySQL).
Business Report Development using Jasper Report.
Invigilating examinations.

EDUCATION

Diploma In Software Engineering
(IJSE)

BCS - Higher Education Qualifications
(BCS-HEQ)

TECHNICAL PROFICIENCIES:

JavaScript, JQuery, HTML, HTML5, CSS,
CSS3, Ajax, Bootstrap, Web Services
(REST/SOAP), SpringBoot , Java,
Object-Oriented Design,
Hibernate, Apache Kafka, Maven, MySQL,
Docker, Angular, GitLab, Bitbucket,
Interface Design (UI)
